

Our business at a glance...

PM PROJEN is a multi-disciplined Engineering Design and Project Management business that is part of the PM Group. PM Group is a 2,600 strong, employee owned business that operates across Europe, Asia and the USA. Together with the wider PM Group business, we provide a comprehensive offering delivered in a proactive and creative style.

PM PROJEN is one of the UK's leading project engineering consultancies across our target markets, as a result of continual investment in our people, our systems and our business processes.

Our core business involves all elements of the project lifecycle from project inception, (including feasibility studies, capital justifications, front-end engineering) right through the detailed design and construction phases, including the delivery of full turnkey projects.

PM PROJEN provides a flexible, bespoke, innovative and pragmatic service. We work hard to earn our clients' confidence as a trusted partner by working in a collaborative yet challenging style that is focused on all of the project needs whilst sustaining the business benefits for both parties.

What we do...

We provide a diverse range of services and expertise to our clients. In short, we carry out...

Project Development

We can take an idea or concept from a blank sheet of paper right through to the implementation of a fully operational plant. We are renowned for our creative approach to problem solving which has allowed us to supply innovative solutions in the most cost effective manner, whilst maintaining best practice techniques.

Capital Costs Development & Project Programme

Accurate costing and realistic planning are at the heart of the decision making process. We provide clients with cost and delivery certainty by taking projects through a rigorous estimating and programming process.

Detailed Engineering Design

We develop engineering designs for a range of complex and challenging projects, many of which have been recognised with awards from external bodies such as the ECI (European Construction Institute) and the IChemE.

Project Delivery

We have managed the delivery of a vast range of iconic projects over the last 40+ years. We are proud that our attention to safe practice has been rewarded with 16 consecutive RoSPA Gold Awards, complimented by our second RoSPA Order of Distinction. Safety is paramount to our business and clients can be confident that this aspect of project delivery is second to none.

Operational Support

Our operational support services include: training, process optimisation/improvements, health, safety and legislative compliance support, plant expansion advice, as-built data capture and document management. We also provide technical due diligence and post incident technical support services.

We work across a range of market sectors for a diverse mix of clients ranging from SMEs to multinational blue chip companies. Over the years, we have completed thousands of projects, with budgets ranging from a few hundred pounds for consultancy support to multimillion pound design and build projects.

Our Markets...

Advanced Manufacturing & Technology

Our business started in the chemical, process and petrochemical industries before expanding into other sectors. We have always enjoyed the benefits of recruiting the very finest engineers experienced in the design and delivery of projects for these heavily regulated industries. Key differentiators for us in this sector include our in-depth knowledge and practical application of process safety, for example, Hazid and Hazop Studies, relief stream philosophy and sizing, DSEAR/ATEX compliance and Functional Safety (BS EN 61508/11).

Pharmaceutical & Healthcare

Our business has always been dynamic, and the consolidation and growth of PM PROJEN's pharmaceutical & healthcare sector business is a reflection of this evolution. PM PROJEN enjoy Alliance and Approved Supplier agreements going back as far as 20 years with leading blue chip companies such as Sanofi, GlaxoSmithKline and Smith & Nephew. Our experience and flexible approach in this sector have helped us to support our clients with the challenges of sustaining a competitive advantage and accelerating new products to market.

Energy & Environmental

PM PROJEN has over 40 years' experience in the design and build of complex process plants including AD/Biogas, Biofuels, Gasification, Biomass, Waste Water Treatment and Energy Centres. We work with leading organisations who have a passion to develop sustainable projects that utilise a variety of green technologies. Many of our clients in this sector find it difficult to find an independent process consultant and project delivery organisation that can reliably deliver their capital investment plans in a safe, timely and cost effective way, whilst also complying with their legislative, operational and quality needs. PM PROJEN provides these services.

Gas

We are a major service provider in the utilities and pipeline industry offering a single source solution for some of the leading companies within the UK gas industry. We provide specialist gas pipeline, infrastructure design and consultancy services, supported by our multidisciplinary engineering capability. We deliver detailed design for cross country pipelines, diversions, offtakes and AGI's at all pressures and also carry out all of the associated project and cost management, construction management, quantity surveying, asset surveying and drawing management services.

Our Core Values...

PM PROJEN's core values are at the heart of our business and we actively ensure that these are upheld during all stages of a project. We abide by the following...

Safety Focused	Protecting the safety of all people involved in our projects
Fair treatment	Respect for our colleagues and our clients' needs
Quality	Commitment to excellence in customer service and delivery
Trust	To maintain the highest levels of honesty and integrity at all times
Reliability	Do what we say we will and when we said we would
Non adversarial	Challenge positively to drive improvement
Supportive	Never knowingly allow a client or colleague to fail
Committed	Developing long-term, mutually beneficial client relationships.
