

Gas Sector Services at a glance...

PM PROJEN is a multi-disciplined Engineering Design and Project Management business that is part of the PM Group. PM Group is a 2,500 strong, employee owned business that operates across Europe, Asia and the USA. Together with the wider PM Group business, we provide a comprehensive offering delivered in a straightforward and proactive style.

For many years, PM PROJEN has been providing a wide range of engineering services to a range of Gas Utility Businesses in the UK, both via directly engaged assignments and through a number of framework agreements.

The gas sector represents around 30% of our total business in the UK and we have a constant portfolio of projects in the development and delivery phases for clients including; National Grid, Cadent, SGN and Air Liquide. Through our involvement with these clients, we have played our part in keeping the gas network safe and functional and are fortunate to have been involved with a wide range of projects designed to improve the safety and reliability of the gas distribution infrastructure.

Our Gas Engineers have many years of experience in the generation, processing, compression, storage and distribution of Natural Gas in the UK. We have extensive knowledge of all of the key legislation and international standards including; IGEM, API, ASME and GIRS.

What we do...

We provide a diverse range of services and expertise to our clients. In short, we carry out...

Professional Services

We provide multi-discipline Engineering Design (Process, Mechanical, Electrical, Control & Instrumentation and Gas Engineering, including HP, MP, LP and LNG Systems). We can also provide a wide range of Project Management / Engineering Consultancy services including; Project & Construction Management, Design Management, CDM Principal Designer, Feasibility & FEED Studies, Detailed Design, Environmental Analysis, Technical Due Diligence, Process Safety Studies (DSEAR & ATEX) and the provision of seconded Technical Engineering resources (on a project by project basis).

Gas Sector Specialisms (Engineering)

Our specialist gas engineering service provision includes; Gas Engineering Design, Technical Approvals and Appraisals (including GL5, G17 and G35), Cathodic Protection, AGI's, PRI's, Stress & Structural Analysis, Flow modelling and hydraulic analysis, Finite element analysis, Hazardous Area Classification, Design of HP, IP and LP Pipelines, LPG station design & upgrade, LNG station design & upgrade and Biomethane upgrade & grid injection (Gas to Grid).

Asset Surveying and Data Capture Services

We offer a range of Asset Surveying & Data Capture services which are widely used by our Gas Sector clients. These services are provided by a dedicated specialist team who service a wide range of clients. Typical services we provide include ; Asset Records - Data Capture & Management, Drawing Management Services, Land Surveying and Risk based inspection of Gas infrastructure, GIS, Utility Pipeline Walking, Environmental Analysis, Interface Management with other infrastructure e.g. rail and electricity distribution, 3D Laser Scanning, Intelligent CAD & Visualisation, Formal Process Risk Assessment and Hazard modelling.
